SkillLink

SkillLink is a platform where students can learn in-demand real-world skills, teach others what they are good at, and earn by sharing their knowledge through peer tutoring. It connects learners with trusted student tutors based on skills and ratings. Students can build practical experience, showcase their abilities, and create earning opportunities while studying. The platform makes skill-based learning simple, accessible, and career-focused. SkillLink turns student skills into real learning, real teaching, and real income opportunities.

Future Scope

- Global student skill network connecting learners, peer tutors, and hiring companies
- Direct project hiring marketplace where companies recruit based on SkillLink ratings
- Verified skill portfolios replacing traditional resume filtering

Objectives

- Bridge the gap between college learning and real industry skill expectations
- Encourage peer tutoring to build verified skill credibility and ratings
- Enable students to earn through company projects and real-world opportunities

Applications

- Peer skill learning and concept strengthening through student tutors
- Rating-based talent discovery for recruiters and startups
- Project-based student hiring ecosystem for early earning opportunities
